**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2833

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on April 1, 2004 has been entered.

2. The "formal" drawing sheets submitted September 29, 2003 are not considered to be acceptable formal replacement sheets. As previously noted, the proposed drawing corrections contained therein are acceptable.

In addition, the drawings remain objected to because contrary to page 17, line 7, member 157A in Fig. 38 does not appear to be an opening; an opening cannot have shading marks. Applicant alleges that these shading marks refer to a backplate beyond the opening. Yet, no backplate is disclosed. Screw plate 155A, in which opening 157A appears is also shown in Fig. 39; it contains no additional backplate. Further, Fig. 38 shows the screw plate separated from the brush assembly so that there should not even be a plate from another part of the structure behind it. In addition, since a screw must extend through opening 157A and other associated openings, a backplate would not be operable in the location alleged by applicant. Applicant is required to remove the shading shown in opening 157A of Fig. 38.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

3. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in proofreading the specification and correcting any errors of which applicant may become aware in the specification.

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 1-12 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-12 of U.S. Patent No. 6339201. Although the conflicting claims are not identical, they are not patentably distinct from each other because the only substantive difference between the claims is the use of screw terminals in the third rocker section. Applicant has convincingly argued that such terminals are so common as to be understood to be usable in the present device without explicit instructions in the specification. It is therefore seen that one of average skill in the art would have known about such terminals, their uses and advantages, and would have used them in appropriate places such as the third rocker section, especially given their use in other rocker sections of the device.
